Disposal notes

The appliance contains some reusable materials and should be disposed of properly - not simply with unsorted household refuse. Appliances which are no longer needed must be disposed of in a professional and appropriate way, in accordance with the current local regulations and laws.

When disposing of the appliance, ensure that the refrigeration circuit is not damaged to prevent uncontrolled escape of the refrigerant it contains (data on type plate) and oil.

- Disable the appliance.
- Pull out the plug.
- Cut through the connecting cable.

⚠ WARNING
Danger of suffocation due to packing material and plastic film! Do not allow children to play with packing material. Take the packaging material to an official collecting point.

Range of appliance use

The appliance is suitable solely for cooling food in a domestic environment or similar. This includes use in, for example

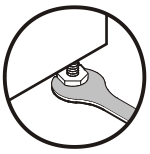
- in staff kitchenettes, bed and breakfast establishments,
- by guests in country homes, hotels, motels and other forms of accommodation,
- in catering and similar services in the wholesale trade.

Use the appliance solely as is customary within a domestic environment. All other types of use are inadmissible. The appliance is not suitable for storing and cooling medicines, blood plasma, laboratory preparations or similar substances and products covered by the 2007/47/EC Medical Devices Directive. Misuse of the appliance can result in the stored products suffering harm or perishing. Furthermore, the appliance is not suitable for operation in potentially explosive atmospheres.

Safety instructions and warnings

- To prevent injury or damage to the unit, the appliance should be unpacked and set up by two people.
- In the event that the appliance is damaged on delivery, contact the supplier immediately before connecting to the mains.
- To guarantee safe operation, ensure that the appliance is set up and connected as described in these operating instructions.
- Disconnect the appliance from the mains if any fault occurs. Pull out the plug, switch off or remove the fuse.
- When disconnecting the appliance, pull on the plug, not on the cable.
- Any repairs and work on the appliance should only be carried out by the customer service department, as unauthorised work could prove highly dangerous for the user. The same applies to changing the mains power cable.
- Do not stand on the plinth, drawers or doors or use them to support anything else.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge unless they have been given initial supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- Avoid prolonged skin contact with cold surfaces or chilled/frozen food. This could cause pain, numbness and frostbite. In the case of prolonged skin contact, protective measures should be taken, e.g. gloves should be worn.
- Do not consume food which has been stored for too long, as it could cause food poisoning.
- If you have a lockable appliance, do not keep the key near the appliance or within reach of children.
- Do not store explosives or sprays using combustible propellants such as butane, propane, pentane etc. in the appliance. Electrical components might cause leaking gas to ignite. You may identify such sprays by the printed contents or a flame symbol.
- Do not allow naked flames or ignition sources to enter the appliance. When transporting and cleaning the appliance ensure that the refrigerant circuit is not damaged. In the event of damage, make sure that there are no ignition sources nearby and keep the room well ventilated.
- Do not use electrical appliances inside the appliance.
- The appliance is designed for use in enclosed areas. Do not operate the appliance outdoors or in areas where it is exposed to splash water or damp conditions.
- Special-purpose lamps (incandescent lamps, LEDs, fluorescent tubes) in the appliance serve to illuminate the appliance interior and are not suited for room illumination.

Setting up



- Avoid positioning the appliance in direct sunlight or near cookers, radiators and similar sources of heat.
- The floor on which the appliance stands should be horizontal and level.Compensate for uneven floors with the adjustable feet.
- There must be a gap of at least 20 cm between the upper edge of the appliance and the ceiling. Always ensure that there is good ventilation and that the outward flowing air is able to escape.
- In order to be able to slide the appliance into a recess, it is fitted with castors at the rear. These castors are not suitable for transportation nor for moving the appliance across uneven floors or steps.
- Standard EN 378 specifies that the room in which you install your appliance must have a volume of 1 m^3 per 8 g of R 600a refrigerant used in the appliance, so as to avoid the formation of inflammable gas/air mixtures in the room where the appliance is located in the event of a leak in the refrigerant circuit. The quantity of refrigerant used in your appliance is indicated on the type plate on the inside of the appliance.
- Do not connect the appliance to the supply with other equipment using an extension cable - risk of overheating.
- Always install the appliance directly against the wall.

Climate rating

The appliance is set to operate within specific ambient temperature limits according to its climate rating. These temperature limits should not be exceeded. The correct climate rating for your appliance is indicated on the type plate.

Climate rating	**Ambient temperature**
SN	+10°C to +32°C
N	+16°C to +32°C
ST	+16°C to +38°C
T	+16°C to +43°C

The appliance complies with the relevant safety regulations and EC directives 2004/108/EC and 2006/95/EC.

Dimensions:

Height: **1990 mm** Width: **600 mm** Depth: **670 mm**

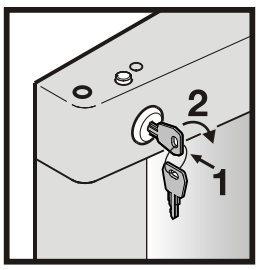
Connecting to the mains

Power supply (a.c.) and voltage at the operating point must comply with the details on the type plate, which is located in the refrigerator compartment on the left-hand side. The socket must be fused with a 10 A fuse or higher, it must be away from the rear of the appliance and must be easily accessible.

Connect the appliance with a properly earthed fused plug and socket only.

Safety lock

The lock in the appliance door is equipped with a safety mechanism.



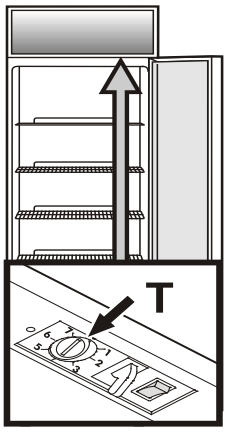
Locking the appliance:

- Insert the key as shown by arrow **1**.
- Turn the key 90° clockwise.

To unlock the appliance, the same procedure must be repeated in the same order. Turn the key anticlockwise.

Switching the appliance on and off

You are recommended to clean the appliance before switching it on for the first time (see "**Cleaning**").



To switch the appliance on:
Connect the appliance to the mains - the appliance is switched on.

To switch the appliance off:
Pull out the mains plug or set the temperature **T** control to "•".

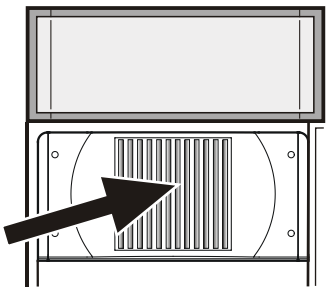
Setting the temperature

Using a coin, turn the arrow on the temperature control **T** to a setting between **1** und **7**.

Setting 1 = highest temperature
Setting 7 = lowest temperature

Cooling

This appliance can be used for chilling all types of drinks and food.



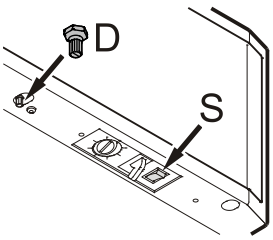
The grid shelves can be moved to accommodate different height bottles or packages. To remove the shelves the door must be opened wider than 90°.

High-percentage alcohols should be tightly sealed and stored upright.

The ventilation slots on the inside must not be covered!

Interior light
Display light

It can be switched on and off by pressing the switch **S**.



Caution - class 1M laser radiation. When cover is removed, do not look directly at light through optical instruments. Severe eye injury can occur.

The lighting may only be replaced by the customer service technician or by competent skilled personnel!

Brightness control (depending on model and options)

The brightness of the interior light may be changed using control **D**.

Defrosting

The refrigerator compartment defrosts automatically. The water that forms on the rear wall drains into a reservoir at the back of the appliance and evaporates automatically through the compressor heat.

Cleaning

Before cleaning always switch off the appliance. Pull out the mains plug or remove/unscrew the fuse.

Clean the inside, equipment parts and outer walls with lukewarm water and a little detergent. Do not use abrasive or acid cleaners or chemical solvents.

Do not use steam cleaners because of the risk of injury and damage.

- Ensure that no cleaning water penetrates into the electrical components or ventilation grille.
- Dry all parts well with a cloth.
- The dust should be removed from the refrigeration unit and heat exchanger - metal grid at the back of the appliance - once a year.
- Do not damage or remove the type plate on the inside of the appliance. It is very important for servicing purposes.

Shutting your appliance down

If your appliance is to be shut down for any length of time, switch it off and disconnect the plug or remove the fuse. Clean the appliance and leave the door open in order to prevent unpleasant smells.

Malfunctions

Your appliance is designed and manufactured for a lengthy, reliable operating life with no malfunctions. If a malfunction nonetheless occurs during operation, check whether it is due to an operating error. Please note that even during the warranty period the resultant servicing costs in this case will have to be borne by the owner.

You may be able to rectify the following faults by checking the possible causes yourself:

- **Appliance does not function:**

– Is the appliance switched on?
– Is the plug correctly fitted in the mains socket?
– Is the socket fuse intact?

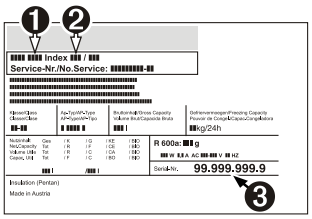
- **Loud running noise:**

– Is the appliance set up firmly on the floor?
– Does the appliance cause nearby items of furniture or objects to vibrate? Please note that noises caused by the refrigerant circuit cannot be avoided.

- **The temperature is not low enough:**

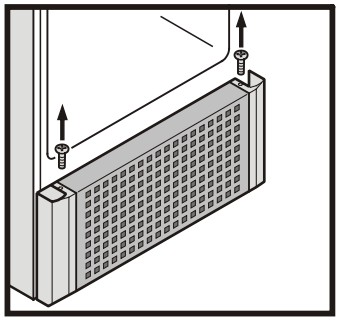
– Is the temperature setting correct (see „Setting the temperature“)?
– Does the separately installed thermometer show the correct reading?
– Is the ventilation system working properly?
– Is the appliance set up too close to a heat source?

If none of the above causes apply and you cannot rectify the fault yourself, contact the nearest customer service department stating the type of appliance ❶, index ❷ and appliance number ❸ as indicated on the type plate. The type plate is located in the refrigerator compartment on the left-hand side.

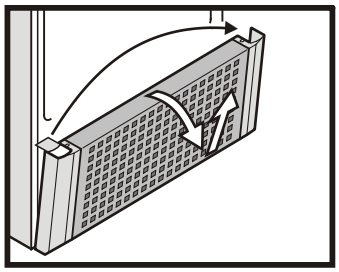


Changing over door hinges

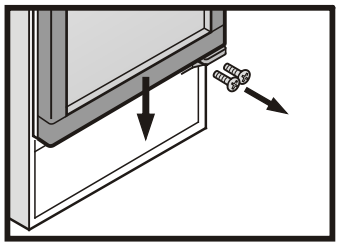
- Open the door.
- Unscrew screws from plinth panel.



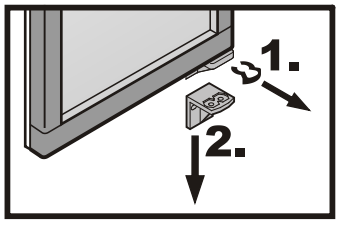
- Remove plinth panel.
- Transfer cover to the opposite side.



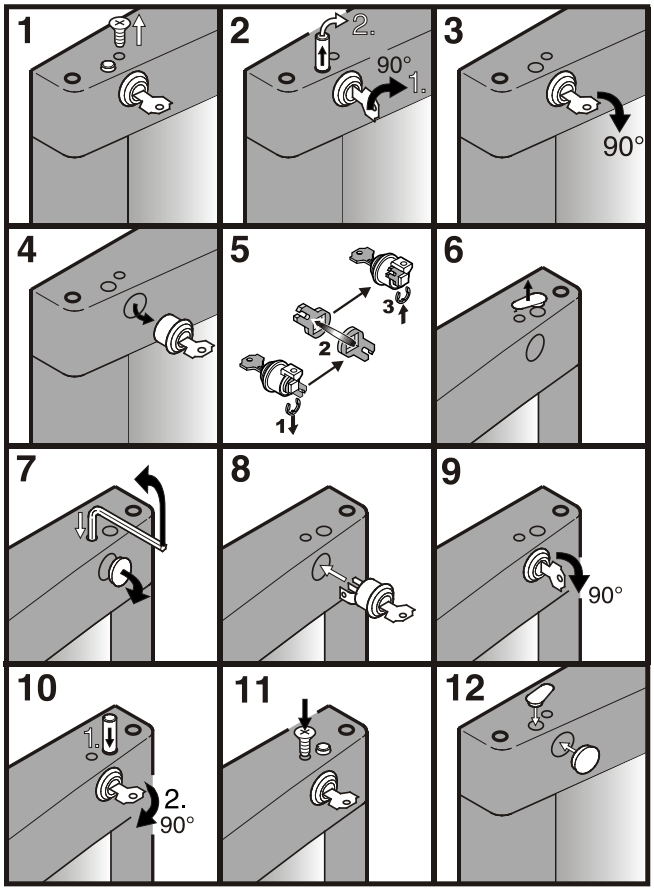
- Unscrew screws from lower hinge bracket.
- Pull the door out at the bottom and lift off.



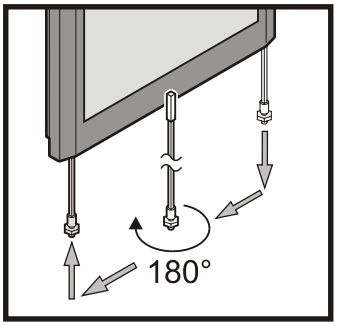
- Pull out the circlip from the lower hinge bracket.
- Remove hinge bracket.



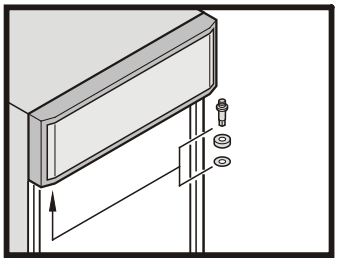
Replacing the door lock



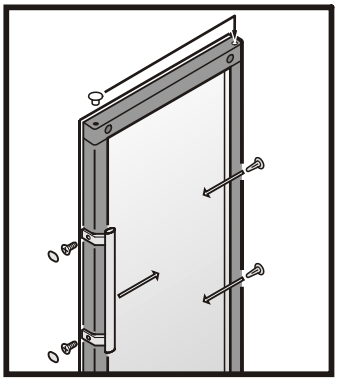
- Pull out the torque rod from the right-hand door mounting. The bar is approx. 1130 mm long.
- Turn the torque rod through 180° horizontally and insert into the left-hand door mounting.



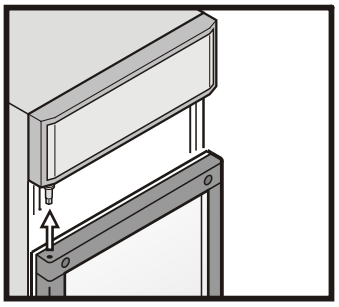
- Transfer hinge pin to the opposite side.



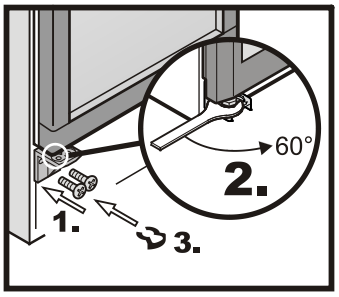
- Transfer handle and plugs to the opposite side of the door.



- Mount door on hinge pin and close.



- Insert hinge bracket in lower door mounting and screw into place.
- Tighten the torque rod with the open-ended spanner provided. The hexagon of the torque rod will lock into the lower hinge bracket.
- Fit the circlip on the lower hinge bracket.



- Open the door.
- Re-attach plinth panel.
